

Business description / Verksamhetsbeskrivning

by Salah Uddin (Diploma in Frontend)

About us: We are a web agency based in Stockholm, Sweden. We focus on making simple websites for small companies from many different branches (for example: restaurant, accounting firm, local grocery store etc). We make responsive websites so that clients can access all the information from any device even without the need for an app.

We provide three different types of services:

Web Development with Responsive Design:

We provide fully customized and Responsive Website creation from scratch with Domain & Hosting configuration. We will help you to display your website on different devices and add Cross Browser Support.

Content Management:

We do have service for complete Website Management including Content Upload and Security Enhancement Preventing Malware and Unwanted Access.

Digital Marketing / SEO:

Our organization can help you with your digital marketing needs. For example- SEO Optimization, promotion on Facebook, Google and other digital platforms. We help you with Keywords updates so that your content reaches the right target audience. We will also provide you audit reports.
